IN THE CLAIMS:

1–18. (previously cancelled)

19. (currently amended) A device, comprising:

a computer processor adapted to conduct a base game; and

a bonus selection apparatus in communication with said computer processor, said bonus selection apparatus including at least one a plurality of changeable surface display element elements, wherein said computer processor is programmed to:

- (a) populate said bonus selection apparatus with at least one a plurality of changeable bonus award amount amounts by identifying at least one a plurality of bonus award amount amounts for display on said bonus selection apparatus from a schedule of bonus award amounts and displaying display said at least one plurality of identified bonus award amount amounts on said plurality of changeable surface display element elements in response to the identification of said at least one plurality of changeable bonus award amount amounts by said computer processor, wherein a plurality of changeable bonus award amounts are displayed on separate changeable surface display elements and wherein the number of bonus award amounts displayed on said bonus selection apparatus is less than the number of bonus award amounts available to be displayed according to said schedule of bonus award amounts; and
- (b) conduct a bonus feature in response to a bonus trigger condition detected by said

computer processor by controlling said bonus selection apparatus to select at least one bonus award amount from among said at least one bonus award amount, including said plurality of changeable bonus award amount amounts, displayed on said bonus selection apparatus.

20. (currently amended) The device of claim 19 wherein said bonus selection apparatus is rotatable about an axis and includes a plurality of said surface display elements disposed on said bonus selection apparatus such that different bonus award amounts are visible as said bonus selection apparatus rotates such that said bonus selection apparatus is adapted to select at least one bonus award amount from among said bonus award amounts, including said plurality of changeable bonus award amount amounts, by rotating said surface display elements.

21. (previously added) The device of claim 19 wherein said bonus selection apparatus is fixed and includes a plurality of said surface display elements disposed on said bonus selection apparatus.

22. (currently amended) The device of claim 19 wherein said bonus selection apparatus comprises a video display adapted to depict an object with said bonus award amounts arranged on the surface of said object, said object depicted as rotationally mounted at a rotating image such that different bonus award amounts are visible as said object rotates moves.

Serial No.: 10/815,304  
Filed: Mar. 31, 2004

23. (previously amended) The device of claim 19, wherein said computer processor is adapted to randomly identify at least one changeable bonus award amount for display on said bonus selection apparatus.

24. (previously amended) The device of claim 19 wherein said computer processor is programmed to conduct a base game and identify, during the course of conducting said base game, at least one changeable bonus award amount for display on said bonus selection apparatus.

25. (currently amended) The device of claim 24 wherein said bonus selection apparatus is adapted to change the display of at least one of said bonus award amount amounts during the course of said base game.

26. (currently amended) The device of claim 19 ~~wherein said computer processor~~ wherein said computer processor is programmed to conduct a series of base games and identify, between conducting said base games, at least one changeable bonus award amount for display on said bonus selection apparatus.

27. (currently amended) The device of claim 26 wherein said bonus selection apparatus is adapted to change the display of said plurality of bonus award amount amounts between base games.

28. (currently amended) The device of claim 26 wherein said bonus selection apparatus is adapted to change the display of said plurality of bonus award amount amounts during the course of said base game.

29. (currently amended) A device, comprising:

a computer processor programmed to conduct a base game in response to an input received from a player; and

a bonus selection apparatus in communication with said computer processor, said bonus selection apparatus including at least one a plurality of changeable surface display element elements, wherein said computer processor is programmed to:

- (a) populate said bonus selection apparatus by identifying a plurality of changeable bonus award amounts from a schedule of bonus award amounts and changing said plurality of changeable surface display element elements to display said plurality of identified bonus award amounts on said changeable surface display element elements in response to the identification of said plurality of changeable bonus award amounts by said computer processor, wherein each of the bonus award amounts is displayed on a separate changeable surface display element and wherein the number of bonus award amounts displayed on said bonus selection apparatus is less than the number of bonus award amounts available to be displayed according to said schedule of bonus award amounts;
- (b) conduct a bonus feature in response to a bonus trigger condition detected by said computer processor by controlling said bonus selection apparatus to select at least one

bonus award amount from among the bonus award amounts, including said changeable bonus award amounts, displayed on said bonus selection apparatus; and

(c) issue said at least one bonus award amount selected by the bonus selection apparatus to said player.

30–31. (currently canceled)

32. (previously amended) The device of claim 29 wherein said base game produces at least one outcome, wherein said computer processor is adapted to identify said plurality of changeable bonus award amounts for display on said bonus selection apparatus based, at least in part, on an outcome of the base game.

33. (previously added) The device of claim 32 wherein said base game includes game symbols and said outcome of said base game is based on at least one game symbol selected in said base game.

34. (previously added) The device of claim 32 wherein said base game includes game symbols and said outcome of said base game is based on at least one combination of game symbols selected in said base game.

35. (previously amended) The device of claim 32 wherein said outcomes include at least one

winning outcome, wherein said computer processor is adapted to identify said plurality of changeable bonus award amounts for display on said bonus selection apparatus based, at least in part, on the occurrence of at least one winning outcome in said base game.

36. (previously amended) The device of claim 32 wherein said outcomes include at least one winning outcome, wherein said computer processor is adapted to identify said plurality of changeable bonus award amounts for display on said bonus selection apparatus based, at least in part, on the occurrence of no winning outcomes in said base game.

37. (previously amended) The device of claim 29, wherein said computer processor is adapted to randomly identify said plurality of changeable bonus award amounts for display on said bonus selection apparatus.

38. (previously amended) The device of claim 29 wherein said computer processor is adapted to identify said plurality of changeable bonus award amounts for display on said bonus selection apparatus based, at least in part, on the quantity of base games played.

39. (previously amended) The device of claim 38 wherein each base game produces at least one outcome, said outcomes including at least one losing outcome, wherein said computer processor is adapted to identify said plurality of changeable bonus award amounts for display on said bonus selection apparatus based, at least in part, on the quantity of consecutive base games in which a

losing outcome is produced.

40. (previously amended) The device of claim 29 wherein said computer processor is programmed to identify, during the course of conducting said base game, said plurality of changeable bonus award amounts for display on said bonus selection apparatus.

41. (previously amended) The device of claim 40 wherein said bonus selection apparatus is adapted to change the display of said bonus award amounts during the course of said base game.

42. (previously amended) The device of claim 29 wherein said computer processor is programmed to conduct a series of base games and identify, between conducting said base games, said plurality of changeable bonus award amounts for display on said bonus selection apparatus.

43. (previously amended) The device of claim 42 wherein said bonus selection apparatus is adapted to change the display of said bonus award amounts between base games.

44. (previously amended) The device of claim 42 wherein said bonus selection apparatus is adapted to change the display of said bonus award amounts during the course of said base game.

45. (currently amended) A method comprising:

providing a bonus selection apparatus at a gaming device having a processor and a base game display, said bonus selection apparatus including at least one changeable surface display element;

said processor conducting a base game at said gaming device;

populating said bonus selection apparatus by:

(a) said processor identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus from a schedule of bonus award amounts wherein the number of bonus award amounts identified for display on said bonus selection apparatus is less than the number of bonus award amounts available to be displayed according to said schedule of bonus award amounts; and

(b) said processor signaling said plurality of changeable surface display element elements to change such that said a plurality of said identified bonus award amounts are displayed on said bonus selection apparatus on separate surface display elements, wherein said plurality of changeable bonus award amounts identified for display on said bonus selection apparatus replace any bonus award amounts previously displayed on said surface display element;

said processor conducting a bonus feature in response to a bonus trigger condition by controlling said bonus selection apparatus to select a bonus award amount from among said plurality of bonus award amounts, including said changeable bonus award amounts, displayed at said bonus selection apparatus; and

said processor awarding the selected bonus award amount, if any.

46–47. (currently canceled)

48. (previously amended) The method of claim 45 wherein said base game produces at least one outcome, wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus is based, at least in part, on an outcome of the base game.

49. (previously added) The method of claim 48 wherein said base game includes game symbols and said outcome of said base game is based on at least one game symbol selected in said base game.

50. (previously added) The method of claim 48 wherein said base game includes game symbols and said outcome of said base game is based on at least one combination of game symbols selected in said base game.

51. (previously amended) The method of claim 48 wherein said outcomes include at least one winning outcome, wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus is based, at least in part, on the occurrence of at least one winning outcome in said base game.

52. (previously amended) The method of claim 48 wherein said outcomes include at least one

winning outcome, wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus is based, at least in part, on the occurrence of no winning outcomes in said base game.

53. (previously amended) The method of claim 45, wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus includes randomly identifying a plurality of changeable bonus award amounts.

54. (previously amended) The method of claim 45 wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus is based, at least in part, on the quantity of base games played.

55. (previously amended) The method of claim 54 wherein each base game produces at least one outcome, said outcomes including at least one losing outcome, wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus is based, at least in part, on the quantity of consecutive base games in which a losing outcome is produced.

56. (previously amended) The method of claim 45 wherein said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus occurs during the course of said base game.

Serial No.: 10/815,304

Filed: Mar. 31, 2004

57. (previously added) The method of claim 56 wherein the display of said bonus award amount changes during the course of said base game.

58. (previously amended) The method of claim 45 wherein said method includes conducting a series of base games and said step of identifying a plurality of changeable bonus award amounts for display on said bonus selection apparatus occurs between base games.

59. (previously amended) The method of claim 58 wherein the display of said bonus award amounts changes between base games.

60. (previously amended) The method of claim 58 wherein the display of said bonus award amounts changes during the course of said base game.
